### Lessons from the financial crisis in Ecuador in 1999

Patiño, María Laura

Journal of International Banking Regulation v3n1 PP: 37-70 Aug 2001

ISSN: 1465-4830 JRNLD CODE: JIBR

WORD COUNT: 18306

...TEXT: It ensures that market participants and investors are provided opportunity with accurate information to duly **assess** their risk and **costs**, in order to take any efficient decision. Transparency also multiplies controllers over rules of the game compliance and expels the gridlock effect. Financial system **regulators** in Ecuador are public officials, thus such transparency is reached through public accountability.

Public institutions...

**A Test of Weak-Form Efficiency in Residential Real Estate Returns**

Payburn, William Devaney, Michael; Evans, Richard  
Journal of the American Real Estate & Urban Economics Association v15n3  
pp: 220-233 Fall 1987  
ISSN: 0270-0484 JRNAL CODE: REU

... ABSTRACT: the study was comprised of the population of all sales of single-unit residential property over a 15-year period, 1970-1984. The city was separated into 10 submarkets based on...

... of variance procedure was used to stabilize the variance both within and across submarkets. Nonmarket financing was controlled partially by eliminating transactions with loan-to-value ratios greater than 95%. The remaining transactions were employed to produce a mean return series. Seven of the 10 submarkets showed time patterns, but after adjusting for transaction costs, all 10 submarkets were determined weak-form efficient for the period 1970-1984. However, this was not found for the...

Cash Manager, v8, n3, p1-2, Mar 1985 LANGUAGE: English RECORD TYPE:  
Abstract

ABSTRACT: The Comprehensive Crime Control Act of 1984 contains anti bribery restrictions for financial institutions. Bankers cannot accept "anything of value" for "any transaction". The intent of the law is to prevent bribery with large gifts, but a cash...

...be accused of bribing a bank officer by keeping excessively high balances. Cash managers allow excess balances because banks then consider them preferred customers but should decide whether such balances are worth the risk.

...Abstract: pump, when a storage capability is available and the electrical utility offers time-of-day price incentives in order to help level its diurnal load profile. The cost functional for optimal control is the monetary cost of purchased electrical energy. A bilinear model for the heat pump is assumed. When the ambient temperature is cyclic over the 24-hour period of the price pattern, periodic boundary conditions apply and the closed extremal trajectories are found to be unique and easily determined with a one-dimensional numerical search. These extremals have simple characteristics and reveal plausible strategies...

...SPECIFICATION cost of invoking a security layer (Layer).

The minimum of this cost curve provides the threshold (Th). A low transaction value shifts Th to the right, and vice-versa. Thus, the threshold Th is dynamically determined according to the above parameters. Where the proposed transaction is non-monetary, such as access control, a non-monetary value is assigned. As shown in Fig. 3 in this example the threshold Th is...

KR 2007120223	A	KO	1		

Alerting Abstract ... total expenditure(S30). The control part compares the total expenditure with the designated budget and judges whether the total expenditure exceeds the designated budget(S40). If it is judged that the total expenditure exceeds the designated budget, the control part displays a warning message through a display part(S50). However, in case the total expenditure doesn't exceed the designated budget, the control part calculates the balance between the total expenditure and the designated budget and the remaining...
